

Vintage Glazed Series - Care and Maintenance

To assure that your new kitchen doors and drawer fronts maintain their appearance for years to come, please follow these instructions when cleaning glazed products:

Approved Cleaning

For general maintenance cleaning of doors and drawer fronts use a damp rag with standard dish detergent diluted in warm water.

For tougher stains or spills use non-abrasive bleach based cleaners.

Cleaning Products to Avoid

The following cleaning products should never be used on Vintage Glazed Series doors and drawer fronts: ammonia based cleaners; citrus based cleaners; abrasive cleaning agents; abrasive pads; granulated detergents.

Please remember that the glaze on your doors is a decorative overlay that is applied after the door is fabricated. Therefore, it is possible to remove it by excessive scrubbing or the use of non-compliant cleaning agents.

If you have any questions regarding these cleaning instructions please contact the Service Department at 1-800-237-0799.
